PROFILE SUMMARY

Software Development Engineer with hands-on experience architecting production-grade full-stack and microservices applications. Proficient in Java, Spring Boot, React.js, and distributed systems integration (RabbitMQ, Eureka, Keycloak). Backed by a strong foundation in Data Structures, Algorithms, and scalable RESTful API design. Adept at Agile/Scrum workflows and CI/CD pipelines, Motivated to leverage robust backend and system design skill set to deliver secure, highly efficient enterprise solutions.

TECHNICAL SKILLS

Languages	Java, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL.
Frontend	React.js, Redux Toolkit, React Router, Tailwind CSS, Bootstrap, Component-Driven Design.
Backend & Distributed Systems	Spring Boot, Spring Cloud (Eureka, API Gateway), Node.js, Express.js, RESTful APIs design.
Databases	PostgreSQL, MySQL(queries, joins, indexing), MongoDB (schema design, aggregation).
Security & Architecture	Microservices, Event-Driven Architecture, Keycloak (OAuth2/OIDC), JWT Auth.
Core Concepts	Object-Oriented Programming (OOP), Data Structures & Algorithms, RDBMS, System Design Basics, State Management.
DevOps	Agile & Scrum Methodologies, Git, GitHub Actions (CI/CD), Postman, Docker.

PROJECTS

DUTYFIXIT — Full-Stack Service Booking Platform - Final Year Project

Nov 2025 – 2026

React.js, Node.js, Express.js, MongoDB, Agile, GitHub Actions

- Developed a multi-portal web application that ensures secure workflow isolation across 3 distinct user roles (Clients, Workers, Admins) by utilizing **React**, **React Router**, and component lazy-loading.
- Implemented a resilient authentication system that enables secure, silent session refreshes without disrupting the user experience by engineering a dual-token **JWT flow in Node.js/Express** and custom **Axios** interceptors.
- Developed scalable **RESTful APIs** for booking, authentication, and user management.
- Optimized database performance and **system architecture**, reducing database read operations by over 60% and establishing production readiness, by resolving N+1 query inefficiencies via MongoDB aggregation pipelines and configuring GitHub Actions for automated CI/CD.

Fitness Tracker— Full-Stack AI Powered tracking platform- Personal Project

Mar 2026 – Apr 2026

Spring Boot, Spring Cloud, Keycloak, RabbitMQ, React.js, PostgreSQL, MongoDB, Gemini API

- Architected a fault-tolerant, scalable backend platform**, successfully isolating data across 3 independently deployable domains using the database-per-service pattern, by building a **Spring Boot microservices** ecosystem routed through **Spring Cloud Gateway** and **Eureka**.
- Centralized system security and access control**, standardizing authentication across all microservices without relying on custom-coded token handlers, by **integrating Keycloak (OAuth2/OIDC)** as a dedicated enterprise identity provider.
- Eliminated synchronous processing bottlenecks between the activity and AI recommendation engines, achieving seamless, non-blocking event consumption, by decoupling inter-service communication via **RabbitMQ message queues**.
- Delivered personalized insights to end-users, efficiently processing complex activity datasets, by integrating the **Google Gemini API into the AI service** and externalizing all system configurations via **Spring Cloud Config Server**.

EXPERIENCE

Frontend Developer Internship - XploCode Infotech Private Limited

May 2025 – Jun 2025

- Developed responsive, user-centric web interfaces that improved cross-device accessibility by translating **UI/UX wireframes** into functional, interactive front-end components.
- Optimized front-end performance and page load speeds by structuring semantic HTML, writing clean CSS, and implementing modern **web design principles** to enhance the overall user experience.
- Collaborated within a professional development environment to deliver project milestones on schedule, gaining hands-on experience with version control and **agile workflow** practices.

EDUCATION

B.E. Computer Science & Design

Sethu Institute of Technology, Virudhunagar, Tamil Nadu

CGPA: 7.01 / 10

2022 – 2026

CERTIFICATIONS

- Java Programming - Intellipaat
- Introduction to Generative AI & Responsible AI Principles - Google Cloud
