SUMMARY

Software Engineer with hands-on experience in Core Java, OOP, and building production-grade microservices using Spring Boot, Spring MVC, and Spring Cloud. Shipped an AI-powered distributed health platform and a multi-portal booking system with strong database fundamentals MySQL, PostgreSQL, MongoDB, Spring Data JPA, event-driven systems, and end-to-end ownership from architecture to deployment

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Spring Cloud Gateway, Eureka, Spring Data JPA, Hibernate, JDBC, Node.js, Express.js, REST APIs

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, Maven, Git, GitHub, Jenkins, CI/CD

Architecture: Microservices, RabbitMQ, Event-Driven Architecture, Keycloak, OAuth2, OIDC, JWT

Testing & CS: JUnit, End-to-End Testing, OOP, Collections, Multithreading, SOLID, Data Structures & Algorithms, Operating Systems, Computer Networks, Agile

PROJECTS

FiTracker – AI-Powered Distributed Health Intelligence Platform

Apr 2026

Spring Boot, Spring Cloud, RabbitMQ, React.js, PostgreSQL, MongoDB

- Architected a fault-tolerant microservices platform using Spring Cloud Gateway and Eureka with database-per-service architecture enabling independent deployment.
- Integrated Keycloak (OAuth2/OIDC) for centralized authentication, reducing duplicated authentication logic by nearly 70%.
- Implemented RabbitMQ event-driven communication replacing synchronous REST calls and improving throughput under concurrent load.
- Integrated Google Gemini API to deliver AI-powered health insights while managing centralized configuration using Spring Cloud Config Server.

DutyFixIt – Multi-Portal Blue-Collar Service Booking Platform

Nov 2025

React.js, Node.js, Express.js, MongoDB

- Developed a multi-portal application supporting Client, Worker, and Admin workflows with role-based access control.
- Implemented dual-token JWT authentication with silent refresh using Axios interceptors for uninterrupted user sessions.
- Designed and built 10+ RESTful APIs for booking, authentication, and user management following REST principles.
- Optimized MongoDB aggregation pipelines reducing database read operations by over 60% and automated deployments using GitHub Actions.

EXPERIENCE

Web Developer Intern

May 2026 – Jun 2026

XploCode Infotech Private Limited, Madurai

- Developed reusable responsive UI components using React.js, Tailwind CSS, and Bootstrap ensuring compatibility across all devices.
- Improved page load performance by nearly 30% through semantic HTML, reusable CSS utilities, and modern web practices.
- Collaborated within Agile/Scrum teams using Git, participating in sprint planning, code reviews, and production feature delivery.

EDUCATION

Sethu Institute of Technology

2022 – 2026

B.E. Computer Science & Design

CGPA: 7.1/10

CERTIFICATIONS

- Java Programming – Intellipaat
- Introduction to Generative AI & Responsible AI Principles – Google Cloud
